

PROGRESS TOWARD BETTER BTK INTERVENTIONS

Designed, tested, and approved* specifically for BTK intervention

micro•stent®

- 48-strand micro-scaffolding system for optimal lesion coverage and protection
- Self-expanding nitinol alloy with platinum core allows for ultrasound visualization
- Enhanced conformability for tortuous anatomy
- 3.2 Fr. shaft for least invasive approach
- 40cm./120cm. shaft lengths allowing for multiple approaches

*The Micro Vascular Integrated Platform (mVIP)

— MicroStent is currently an investigational device in the U.S.
